

Cold water trolleys up to 500 bar (7,250 PSI)

Dynajet® trolleys are compact and affordable professional high-pressure cleaners. Sturdy workers in industrial cleaning.

- Working pressure up to 500 bar (7,250 PSI)
- Discharge rate up to 42 l/ min (2,520 l/ h)
- Cold water machines
- With electric, diesel or petrol engine
- Monitoring of engine and oil pressure (petrol and diesel version)

Designed as machines for professional use Dynajet® provides the following **technical highlights:**

- Single-axle trolley principle
- Adjustable pressure regulation
- Water filter
- Temperature monitoring
- Low water cut-off devices
- Machine cleaning
- Facade cleaning
- Graffiti removal
- Formwork and scaffolding cleaning
- Construction machinery cleaning
- Mixer cleaning
- Industrial cleaning
- and for many other purposes ...

Hot water trailer up to 500 bar (7,250 PSI)

Dynajet® trailer are powerful top-range high-pressure cleaners for professional use up to 500 bar (7,250 PSI). These aggregates have integrated high performance burners for hot water production. Due to their big water tanks, they can work independently from the local water network. Powerful diesel engines provide enough drive power.

- Working pressure up to 500 bar (7,250 PSI)
- Discharge up to 30 l/ min (1,800 l/ h)
- Water tank up to 1,000 l
- With robust diesel engine
- Water temperatures up to 110° C
- Targa concept for separated engine/ pump and operating access

Covering vast application fields:

- Facade cleaning or refurbishment
- Graffiti removal
- Formwork and scaffolding cleaning
- Construction machinery cleaning
- Mixer cleaning

and additionally

- Concrete refurbishment
- Roof cleaning
- Cleaning of grits (for example in paintshops)
- Shipyard cleaning
- Tank cleaning
- Refineries and petrol chemical industrie
- Industrial cleaning
- and for many other purposes ...

Hot water trailer up to 800 bar (11,600 PSI)

High demands in industrial cleaning and construction industry require a **Dynajet® hot water** solution with 800 bar (11,600 PSI). The Dynajet® 800th is one of the worldwide few high-pressure jetting systems with hot water up to 800 bar (11,600 PSI).

- Working pressure up to 800 bar (11,600 PSI)
- Discharge rate up to 22 l/ min (1,320 l/ h)
- 32 kW diesel engine
- 1,000 l water tank
- Water temperature up to 110° C
- Targa concept with separated machine and operator side
- Robust and easy to handle steering device

The Dynajet® 800th is used everywhere, where highest performance and pressures are required:

- Rust removal
- Corrosion protection
- Paint removal
- Mixer cleaning
- Concrete refurbishment and removal
- Cleaning of grits
- Heat exchanger cleaning
- Tank cleaning
- Sieve and filter cleaning
- and for many other purposes ...

Tailor made accessories for every cleaning task

Besides the choice of a suitable high-pressure cleaner the appropriate combination with its quality accessories defines the cleaning result of every given cleaning task.

We serve you with optimized accessories for nearly any thinkable cleaning challenge. Different nozzle types, HP-hoses and guns, systems for wall and surface cleaning, roof cleaning devices and last but not least a variety of protection clothes facilitates your work and enlarges your productivity.

Extended test phases have accompanied the development of these cleaning and surface preparation tools, guarantying you optimal conditions at your specific jobsite.

Naturally we here only present you a limited assortment out of our vast accessory range.

The complete range of accessories and high pressure cleaners from 300-3000 bar (4,350 - 43,500 PSI) you find in our Dynajet catalogue, on our website www.dynajet-online.com or at our Putzmeister-Competence-Centre.

Dynajet® solutions for high-pressure cleaning

Dynajet® high-pressure cleaners are true professional machines for almost every application: Handy trolleys with electro, petrol and diesel drive up to 500 bar (7,250 PSI). Powerful hot water diesel trailers up to 800 bar (11,600 PSI). The Dynajet® range covers everything the professional user is looking for.
